

*Where Women Take The Stage*

**Strand Theater Company – COVID-19 Protocols for Audience Members of In-Person Performances**

- Strand Theater Company requires all patrons to wear a mask/face covering inside the building, while not actively eating or drinking. If a patron requires a mask, the theater staff will provide one, free of charge.
- Upon entry to the building, patrons will report to the box office counter to have their temperature scanned with an infrared thermometer. Anyone presenting with a temperature of 100F or higher will be asked to reschedule their visit to the next available performance.
- A proof of vaccination in a form of a physical card, a photocopy or a digital image is required for attendance. No exceptions will be offered.
- A state-of-the-art air purifying system will be in use before the show, during intermission, and after the show, for the safety of our artists and audience. The purifiers will be turned off during performances so as not to disrupt the production with white noise.
- All areas of the theater will be cleaned and sanitized between uses.
- Hand-sanitizing stations will be set up in the theater and the lobby for patrons' use.
